

Thank you for choosing “Journal Club.” If you have a Mac, please see the Mac Read Me file. If you have a Windows pc keep reading. In this zip file you will find two install files:

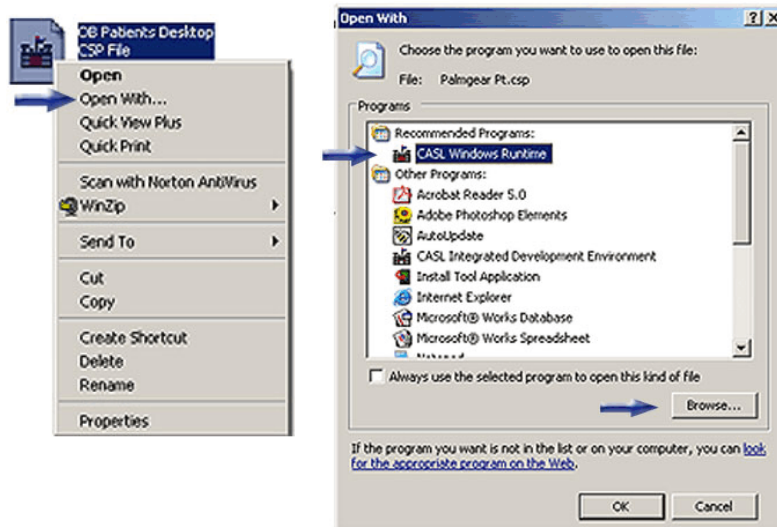

You should install either the black and white or color version of the program.

The Journal Club desktop lets you display Journal Club on your laptop. If you have a projector, you could then project the calculations for everyone to see. You can run the Journal Club Desktop from the folder you unzipped your download to, but if you want to move it to another folder you will need to copy the Journal Club Desktop, CASLwin, and jcDefnDB files to the same folder.

Double clicking on the Journal Club Desktop icon should open the Desktop. if it does not, right click on the Desktop icon and choose Open with... then choose CASL Windows Runtime from the list.

If CASL Windows Runtime doesn't appear on the list choose browse and go to the folder you put the files in and choose CaslWin.

You can get your free registration code from my website: www.FPpda.com. If you have any questions or concerns please email me Tim@FPpda.com. You may also like to see my other software, free programs, medical pda information, Palm Os tutorials, and links when you visit my website.
